Protecting your financial security and your family’s well-being

- What is long-term care?
- The benefits of long-term care (LTC) insurance
- Coverage and features in John Hancock’s LTC insurance policies
What is long-term care?

• Long-term care is the type of assistance you would need if you:
  – Are Chronically Ill and unable to handle some of the basic activities of daily living (ADLs) on your own
    ▪ OR
  – Require substantial supervision due to a significant cognitive impairment
What are activities of daily living?

- Activities of daily living (ADLs) include:
  - Eating
  - Bathing
  - Dressing
  - Toileting
  - Continence
  - Transferring (from bed to chair)
What is a cognitive impairment?

• A condition that leads you to require substantial supervision to protect yourself or others from dangers to health and safety
  – Example: Supervision due to Alzheimer’s disease, brain injury, or stroke
Is LTC insurance the right choice for me?

- Helps protect your retirement assets
- Helps preserve your independence
- Gives you choices and control over where to receive care
- Reduces the burden of care that can fall on family members
- Offers care planning expertise, advice, and resources when you need care
The cost of care

• The national average for 24-hour home care or one year in a nursing home can cost more than $85,755¹

• If costs increase at 4.1% per year, the average cost of care in 30 years would be $286,000 a year²

Accessing your policy benefits

• You become eligible to receive benefits when you are Chronically Ill and a licensed health care practitioner indicates that you will need either of the following:
  – Substantial assistance, due to the loss of functional capacity, with at least two out of six activities of daily living (ADLs) for at least 90 days,
    ▪ OR
  – Substantial supervision to protect yourself from threats to health and safety, due a cognitive impairment such as Alzheimer’s disease, brain injury, or stroke.
The cost of LTC Insurance

- The cost of a LTC insurance policy is based on specific policy design — the benefit amount, elimination period (deductible) and benefit period selected.
- Your age and health are also key factors that will determine the cost of your long-term care insurance policy.
- The younger and healthier you are when you purchase your policy, the more affordable it will be.
Designing your policy

- **Benefit Amount** – the total amount of money your policy will provide
- **Benefit Period** – the minimum number of years coverage will last
- **Elimination Period** – like a deductible, you pay for the cost of care for a certain number of days before your coverage begins
- **Inflation Protection** – keeps coverage in line with future cost of care to help ensure your benefits grow with the rising cost of care
Select a benefit amount

- Choose from a Daily or Monthly Benefit
  - Daily: $50 to $500 (in $10 increments)
  - Monthly: $1,500 to $15,000 (in $100 increments)

4. The maximum amount paid per day is the Daily Benefit amount. The maximum amount paid per month is the Monthly Benefit amount.

In WI, the minimum Daily Benefit is $60 and the minimum Monthly Benefit is $1,800. In VT, the minimum Daily Benefit is $75 and the minimum Monthly Benefit is $2,250.
Select your benefit period

- Benefit Period is the minimum number of years you can expect your coverage to last
  - 2 years (730 days) or 24 months
  - 3 years (1,095 days)
  - 4 years (1,460 days)
  - 5 years (1,825 days)
  - 6 years (2,190 days)
  - 10 years (3,650 days)
Calculate your total benefit

- Your total benefit is your “Total Pool of Money” from which benefits are paid. Multiply your Daily or Monthly Benefit by your selected Benefit Period.

- Monthly Benefit Example
  - $4,500/Month X 4 years (48 months) = $216,000

- Daily Benefit Example
  - $150/Day X 4 years (1,460 days) = $219,000
Choose an Elimination Period (EP)\(^5\)

- Similar to a deductible — you pay for services for a certain period before the policy pays\(^6\)
  - 30 days
  - 60 days
  - 90 days
  - 180 days
  - 365 days

---

5. The 180- and 365-day Elimination Periods are not available in VT.
6. For Home Health Care, a minimum of 2 hours of covered care per day is required to count as one day toward your Elimination Period.
